DETAILED ACTION

Status of the Application

The IDS PTO-1449 (Paper No. 6) received on 11 June 2001 has been entered.

Claims 10-20 of the present Application are pending and are subject to restriction requirements.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 10-16, drawn to compound of Formula I, assay using said compound and method of making said compound.

Group II, claim(s) 17-18, drawn to compound of Formula II and method of making said compound.

Group III, claim(s) 19-20, drawn to a method of identifying an inhibitor of CYP2CP and the compound produced.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The compounds of Groups I-III are each different and distinct from each other, having different functions. Unity is, thus, lacking, as there is no one unifying feature.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1651

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
